North Dakota Infant Hearing Road Map

The ND Early Hearing Detection & Intervention Road Map is a quick reference on the "next steps" for complete hearing health care.

Screen before 1 month

1st hearing screen:

Date: ____/____/____

Hearing Screen Results:

Left Ear — Right Ear

☐ Did not pass ☐

☐ Pass ☐

Schedule an outpatient screen, if your baby did not pass the birth screen.

Outpatient Hearing Screen:

Place:_____

Date: ____/____/____

Outpatient Hearing Screen Results:

Left Ear — Right Ear

☐ Did not pass ☐

☐ Pass ☐

If your child **DID NOT PASS** the screen and/or re-screen, your baby will need to see an Audiologist for further testing. Continue to monitor Language/ Communication Milestones.

If your baby passes her/his screening and/or evaluations while on the journey of hearing health care, followup care is complete. Continue to monitor milestones, and follow risk-factor care recommendations.

Milestone

By 2 Months of age:
- Coos, makes gurgling sounds
- Turns head toward sounds

Diagnose before 3 months

Pediatric Audiology Appointment:

Place: _____

Audiologist: _____

Date: ____/____/____

Diagnostic Audiology Results:

Left Ear — Right Ear

☐ Did not pass ☐

☐ Pass ☐

If your baby has **Confirmed Hearing Loss**

Milestone

By 4 Months of age:
- Begins to babble
- Babbles with expression and copies sounds they hear

If your child **has a confirmed hearing loss**, early intervention and family support services are available to support your child's developmental needs and help guide you on your family's journey.

Learn about the resources available to your child and family!

Early Intervention before 6 months

~Part C Infant Development
~Parent Infant Program
~Tribal Early Childhood Tracking
Other: _____

Milestone

By 6 Months of age:
- Responds to sounds by making sounds
- Strings vowels together when babbling ("ah," "eh," "oh")
- Responds to own name

Family Support Services are available at any time during your family's journey
