The Advancing Students Toward Education and Employment Program (ASTEP) at Minot State University (MSU) is an inclusive college program for students with disabilities. ASTEP students take college classes to earn meaningful credentials and gain crucial employment, independent living, and social skills. ASTEP students are supported in all areas of the program by MSU students who serve as peer mentors. Peer mentors are an integral part of the program, along with program advisors and coordinators, who all play essential roles in helping to build quality futures for ASTEP students to live and work in their communities.

Donations received will go toward the cost of funding ASTEP program supports such as peer mentors, program advisors and coordinators, who work to help make college a reality for students with disabilities.

Please consider donating to **ASTEP!** Click [here](#) for more information.

“My favorite part of ASTEP was being enrolled in classes and going to **events with my friends**, but best of all was meeting new people. And...I can't wait to **make my own money!**”

- Michael, ASTEP Graduate

“Support for our son was **phenomenal**. The Person-Centered Planning process was key... was never concerned he was alone or couldn't get help. His social skills have just expanded and **developed in leaps and bounds.**”

- Paula & Gary, Parents of Wes, ASTEP Graduate
