

Technical Assistance

The ND Dual Sensory Project staff can provide technical assistance to educators, early childhood personnel, early intervention staff, administrators, and family members who have questions or concerns about education and support of children with deaf-blindness and other significant support needs. This can be short-term and specific to one question (What is the definition of deaf-blind so we can complete the child's IEP?), or it can be more long term and focused on the team for a specific child (How can we increase the level of team interactions to improve the outcomes for Student B?).

To request technical assistance for a specific child, use the Technical Assistance Request form. This will be reviewed by the ND Dual Sensory Staff, and then you will be contacted to develop a Technical Assistance Plan.

There is no charge for child specific technical assistance.

Questions? Contact Dr. Brent Askvig at brent.askvig@minotstateu.edu or at 701-720-7715.
